

Your Trusted Nordic Partner Group

- _ We enhance readiness
- _ We enable technology access
- _ We fill capability gaps

Serving a
Stronger
Society

MW Group

Introduction

Our mission is to *Serve a Stronger Society* by enhancing readiness, enabling technology access and filling capability gaps. We are driven by our mission to create a strong society by ensuring resilient social functions by resourcing efficient and robust service solutions.

We are your Nordic trusted partner.

Our Values

Execution

Our operation is results-orientated because we have the objective of adding value at every point of service. We always guarantee an execution that assures quality of work, regardless of external conditions.

Engagement

For us engagement means deep professionalism and customer focus, but also the utmost respect towards each other. Our employees are chosen for their level of engagement and the passion they put into their work. Engagement is not only a word – it constitutes the base of everything we do.

Endurance

We have a proven ability to serve our society through our shared background. We will always take responsibility for delivering results, no matter how long or difficult the path is.

Our Operating Companies

Base Operations

MW Field Services

MW Field Services installs, operates, maintain and train. They are experts focusing on military systems and equipment, and are providing connectivity and energy solutions.

LogSec

LogSec is your partner for readiness. By utilizing a vast contractor network, LogSec can enhance your readiness and make sure that you have the right LogCap solution when and where you need it.

Strategic Consultancy

MW Strategy

Experts in strategic and transformational consultancy, public private cooperation and financing, and defence.

Geospatial Solutions

MW Geospatial

Specialists in C4ISR as a solution integrator, enhanced by a strong remote sensing capability.

ForestSense

A Nordic leading digitalization company, creating digital twins of Forest Estates, with a dual-use capacity of pre-battlefield planning.

arbonaut

Experts in geo-data analytics and software development for geo-data applications.

Cyber Solutions

eciberon

Specialists in digital security and network integration that enhance digital resilience and integration for critical infrastructures. The team are experts in advanced Linux configurations, network optimization, and radio technologies, ensuring high-quality service delivery even in the most challenging environments such as The Arctics.

Business Idea

MW Group's business idea is to be a Nordic trusted partner group that owns and operates companies that together form an important part of the Nordic resilience and defence.

Our focus is to develop and acquire companies that contributes to Nordic Host Nation Support and enablement of military Multi-Domain Operations by utilizing dual-use capabilities. Through our decentralized operating model, we utilize the agility and innovation of our companies within the robust frame of the full MW Group.

Our heritage is from the Nordic armed forces. We build the group on a foundation of strong will to serve, a true Nordic platform and a value-based approach that guides us on our journey.
